

SUNMASTER

KEEP THE VIEW AND BLOCK OUT THE SUN

CASSETTE FOLDING ARM TECHNICAL DATA SHEET

Sunmaster supplies two styles of folding arm awning the SENATOR semi cassette and the LINEA full cassette.

SENATOR SEMI CASSETTE FOLDING ARM AWNING

This quality 3-tube system patio Awning ensures comfortable outdoor living, creating a stylish addition to your home or business whilst increasing its value.

Headbox consists of pelmet and frontbar plus endplates all made of extruded aluminium which are powdercoated to suit your taste. Frame parts are 35mm square carry bar [galvanised steel], 78mm galvanised steel tube, arm brackets, end brackets and arms, again extruded aluminium and powdercoated white. Custom powdercoated arms are available for an additional charge. Our Senator Awnings are now fitted with M+ arms meaning the arms are extremely strong and stable made of high grade aluminium, and manufactured with two cables and strong springs. They are also called uneven arms which mean they provide maximum tensioning to the fabric. The construction of this Awning ensures that the tension forces of the Awning are optimally absorbed. The Senator can be fixed in a variety of ways; in front of and in line with guttering, under gutter in front of fascia board and under eaves, all with heavy duty steel brackets or face fixed to brick, concrete or timber or under a concrete slab.

LINEA FULL CASSETTE FOLDING ARM AWNING

The arms are fixed onto robust aluminium supports which can be either wall or ceiling mounted. Arms are M+, similar to the Senator semi Cassette Awning, with a choice of 1500/2000/2500 or 3000mm projections. Maximum width is 6000 x 2500mm or 5500 x 3000mm. Manual operation is by way of a smooth running gear box with a detachable crank handle. Motorised versions can be hard wired or remote controlled, both of which can be fitted with a sun & wind sensor for ease of use with the added benefit of shielding your home automatically whilst you are away.

The Awning finish is in a choice of 150 Dulux powdercoat colours to match any colour scheme. Arms are generally white but can be custom powdercoated for an additional charge.
